BODY OF BABY BOY IS FOUND IN DITCH THURSDAY

Late Thursday afternoon, while walking n ear the south end of the Pine street bridge which spans Deer Creek, L. E. Stein saw what he thought was a baby doll semi-submerged in the old Excelsior irrigation ditch.. When he told Mrs. Stein of what he had seen, she went down to see it and found that it was the body of a new-born baby boy. Coroner A. M. .Holmes were called immediately and as we go to press nothing is known of the baby's identity.

Evidently the baby was thrown into the irrigation ditch somewhere below the County Hospital, near where the ditch has its source. The body floated down the ditch until it lodged in some debris wher it was discovered. It was caught by the back on a board.

There were no indentification marks, nor were there any signs of brutality. The body was wrapped in newspapers that were so old and water soaked that the date or printing was unreadable. The remains were removed to the Holmes Funeral Home.

Sheriff Carter, Coroner Holmes and District Attorney W. E. Wright are investigating the case. .

STATE FOREST RANGER WILL USE 100 MEN

Single men, who would perhaps be otherwise unemployed, will be given an opportunity to earn their board and lodging this winter by the California State Division of Forestry.

Under the supervision of W. F. Sharp, state forest ranger in charge of Nevada county, 100 single men will be employed in clearing bursh and maintaining or re-opening old roads. This year, work will be started by the middle of November. Men working will be furnished with food, clothing and tobacco.

Last year 75 men were employed at this work and although not getting started until December 29th and working but 62½ days out of 90 because of the snows and rains, a very creditable record was established. 214 acres of brush and timber were cleared along the Downieville highway, the Newtown road, the Tahoe-Ukiah highway and the Banner-Nevada City road. A clearing 60 feet wide along the fire trail from the south fork of the Yuba river across to Grass Valley for a distance of 5.1 miles was cut, as was the 50 foot wide cut for one half mile from Indian Flat towards Cement Hill.

In doing this work, the men made an average clearing record of 2770 square feet per working day per man, which is not too bad.

This year, according to Mr. Sharp, weather permitting and with an earlier start, twice as much work should be accomplished. The 25 extra men will, of course, figure in the additional work. It will be interesting to note how the average work done per man per day this year will compare with the record set last yera.

The California State Highway commission will again this year employ married men or men with families or dependants in repairing or building roads. Last year these men were paid $4.00 per day and worked a three day week. Residents of the Grass Valley district worked three days straight and then laid off for the next three days while the residents of the Nevada City district district took up the good work. Using this stagger system of work, it was possible for the highway commission to distribute the work among twice as many men as is possible when working men six days a week.

Mr. and Mrs. H. E. Bolton of this city left last Sunday morning at 8:30 for Gustine, Merced county. There they visited Mr. Bolton's brother until Tuesday when they returned to Nevada City, driving the 175 miles by three o'clock in the afternoon. Mr. Bolton owns and operates the local 5, 10, & 15 cent store. His brother in Gustine owns the same kind of store..

Bishop—Work practically completed on grammar school addition which cost about $5,000.

NEW ENGLAND GROUP UNDER INVESTIGATION

The representative of a well known and highly responsible eastern mining syndicate has been in Nevada City for the past few days examining reports, data, and making field investigation of the New England group of mines in the Gold Flat area just South of Nevada City. These properties include the New England and Sligo patented claims embracing some 3300 feet of lode line, with a generally northerly strike; and the Mohegan and Gold Flat patents, with about the same lenth of lode line striking in a general East and West direction, and intersecting the New England. Other surrounding and near by mining properties are associated with the foregoing in the examination at present being conducted.

The New England is one of those mines which gave an excellent account of itself in the earlier mixing era up to about 1880, but which has received practically no attention of recent years. It was noted for the remarkably highgrade character of its ore, and there are still many of the old miners who recall the specimen rock from the New England as being outstanding in their experience. It was owned by the Walrath Brothers and John V. Hunter, whose successful operations at the Providence Mine over a period of many years rendered the name of that property a watchword familiar in the annals of Nevada county mining.

In the heavy winter of 1880-81, the mine was flooded, and the Walrath interests abandoned operations, intending to resume later with heavier pumps, but their plans were blocked by the loss of their personal fortunes.

The mine lay idle until 1925, at which time the Nevada City Mining Development Association, the present owners, bonded the property to a company who sunk the shaft from the 800 to the 1000 level, at which point operations were unexpectedly terminated by failure in financing. A good vein exists in the bottom of the shaft, and there is said to be ample area of stoping ore betwen certain levels.

With an excellent shaft down 1,000 feet, equipped with track, pump column and lead cable, the New England and associated properties, with their favorable geological situation in the diabase area adjacent to the slate and graodiorite contact of the Nevada City basin, present a most favorable aspect as the key to a very decidedly attractive plan of mining development involving the whole Gold Flat section.

The owners of the New England are local business people headed by E. M. Rector, president; E. C. Uren, vice president; W. E. Wright, secretary; E. J. Ott, treasurer; W. E. Meservey, and W. B. Celio, directors. These gentlemen picked out the New England many years ago as being a winner, and with proper development in sight it is safe to say that their prediction will be realized.

IMPROVEMENTS IN R R SERVICE ANTICIPATED

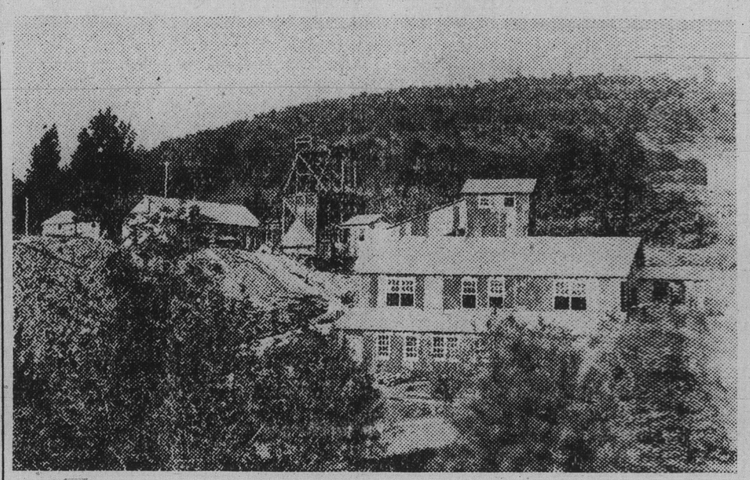
W. A. Wenneson, traffic manager for the N. C. N. G. R. R. Co., dropped into our office Saturday of last week. He was working on business connected with the R. R. Co. and reports things looking up. He says his company will assume active management of the Greyhound Stage Line between Auburn and Nevada City about October 1st and anticipates many improvements in the service as fast as the public patronage will permit. More of their plans will be announced later.

NEW TWO CAR GARAGE HAS JUST BEEN COMPLETED

F. E. Burkhart this week completed a nice two car garage back of his property on Broad street. The dimensions are 18x20 feet over all and the lower story is solid concrete which runs to the ceiling and the ceiling joists are set into the concrete and an upstairs loft built for storage purposes.

The roof is corrugated iron with drains from the eaves and the big double doors are the latest sliding type which slide around to the side completely out of the way. A stairway leads from the loft and the entrance is graveled with lots of room to get in and out. The cost was about $375.00.

Recently Completed Mill at Hoge Mine



New Hoge Mill is Model of Efficiency

The Hoge Development company mill has been running for ten days on a part time schedule, but for the last three days it has been operating the full twenty-four hours.

The above picture of the Hoge mine was taken within the last few days and gives a splendid view of the whole camp.

During the present starting period seven men are employed on operation under the direction of F. G. Moses, the mill superintendent. The mill is exceptionally well designed mechanically and the process is the latest in flotation practice.

Though highly successful in most mineral districts for several years, flotation is just being pioneered in this district.

To express the process simply, it is concentration "upside down." The mineral particles are brought to the surface with a combination of introduced air, and suitable reagents. All free sulphides as well as fine or flour gold are readily flotable. The ratio of concentration, and the value of the concentrates are governed greatly by reagent variations which are under the control of the operator.

In addition to a low capital investment, flotation is extremely low in operation costs, and does not require high technical skill to operate.

Falling by gravity from the mine ore bin into a Blake Jaw Crusher, or coarse crusher, the ore as it comes from the mine is crushed to about two inches in diameter. From there it is conveyed by belt to a fine ore mill bin. From this bin the ore is fed by an adjustable ore feeder belt. The speed of this belt is adjusted by means of a cam and lever arrangement. Dropping off the end of the belt into a fine crusher, the ore is crushed to a maximum of one half inch in diameter. This fine crusher is composed of two huge rollers, both thirty inches in diameter, by ten inches wide, with tension springs to allow for tools or other foreign matter that may otherwise injure the mechanism.

Falling onto a belt conveyer, this fine ore is next carried to a ball mill scoop feeder box, from where the ball mill scoop carries it through the hollow trunion bearing of the ball mill into a Marcy ball mill. Receiving the final crushing process in the ball mill, the ore in powder form is washed by water into a Dorr Drag Classifier.

The fine ore then overflows from the classifier into a six cell Kraut flotation machine which separates by flotation the heavy concentrates from the tailings. The concentrates then go to a smaller cleaner ma-

(Continued on Page Five)

MANY IMPROVEMENTS NOTED IN NEVADA CITY

All about us are many changes in remodeling or improvement in homes.

Mr. and Mrs. Al Seaman are rebuilding a part of their residence on Clark street that was caved by snow several years ago. This will add much to the convenience of the home.

A room is being built back of the Nugget Cafe at the corner of Spring and Pine streets.

The house formerly owned by Mr. and Mrs. John Evans on the corner of Nile and Nimrod streets, now owned by Mr. and Mrs. M. Ivan Dow, is having a new foundation placed under it.

Mrs. Goering is remodeling and repairing her large house on East Broad street into two or three apartments.

Miss Alice Murchie will be moving into her new home within a few days, or as soon as the paperhangers are through.

M. Angiolini of Long street is having a number of improvements made in his home.

The apartment house being built by D. Mezzetta near the depot is almost completed, and will soon be ready to occupy.

NEVADA COUNTY LUMBER CO. MAKES MANY IMPROVEMENTS

F. E. Connor, manager of the Nevada County Lumber company reports this week the company is unlaoding three carloads of lumber, and re-arranging the whole yard to make it more convenient for fast work in handling orders, due to the increase in business.

The company is also planning other improvements which when completed will put everything in first class shape and enable those employed in the yard to handle their work at a much better advantage.

L A CO TAKES OVER LARGE GRAVEL MINE, SIERRA CO

One of the most important mining developments in this section in recent months is the coming to this county of the Western Precipitation company of Los Angeles, which has leased the Loftus placer holdings in the vicinity of Howland Flat.

Thirty men have already been put to work repairing ditches, laying pipe lines, building sluices, preparatory to the spring run. More than 2000 inches of water from Slate creek and tributaries will be available, according to George M. Calvocaresses, the company's engineer, who is in charge of the work.

The gravel is said to prospect well and with several million yards in the 500 acres comprising the company's holdings, the undertaking is the largest to get underway in this country for some time. As soon as the snow breaks in the spring, piping operations will begin, storage of tailings being afforded by Bullards Bar dam.—Mountain Messenger.

CARLOAD OF STEEL BALLS RECEIVED BY 16 TO 1 MINE

The 16 to 1 mine is this week unloading a carload of steel balls to be used in their mill. These steel balls have to be replaced practically every year and it is this replacement that keeps the transportation company busy and gives much needed employment at this time.

This district is sure looking up. Many people from the outside say this is the busiest little city in the state at the present time.

These steel metal balls weigh about 27 pounds each and the car laod weighed about 36 tons.

Pomona—$205,000 concrete and steel grandstand at county fair grounds dedicated.

ASSEMBLYMAN MAYO CAN FIX LINOTYPES

Jesse M. Mayo, assemblyman-elect from Calaveras county, was in Nevada City this week shaking hands and getting better acquainted with Nevada City people. Mr. Mayo's majority over Berle Thomas of Placerville was 36 and he is well satisfied with the result.

The Nevada City Nugget has particularly good reason to feel friendly to Mr. Mayo, who is a newspaperman and all-around printer. When Mayo called at The Nugget office he found the whole force struggling with a linotype problem that threatened to tie up operations. Mr. Mayo took off his coat, rolled up his sleeves and tackled the job with enthusiasm and without any hesitancy about soiling his hands or clothing and he soon had the "old mill" percolating. If Mayo tackles the problems of this assembly district as he tackled the linotype problem he will make one grand assembly man and we believe he will.

During the campaign Mayo impressed all who met him as a clean-cut, intelligent young man who is absolutely sincere. After meeting Mr. Mayo again the editor of The Nugget feels that the voters of the assembly district elected the right man. As a newspaperman Mr. Mayo is familiar with the problems of the district and he is of the type who can be depended upon to do his level best for his district, without fear or favor. We're for you Mayo, we believe in you and we'll back you up to the best of our ability.

STREET IMPROVEMENTS BENEFICIAL TO CITY

Chief of Police Herbert Hallett is a busy man these days, as he is not only looking after the different departments of the city affairs, but he is supervising the building of a cement wall on lower Boulder street from the Sauvee property to the poperty of Robert Allen, a distance of about 100 feet. The side walk is now torn up and forms are being constructed for the wall.

He also has a crew of men employed tearing up the old board walk leading to little Deer Creek on Nimrod street. Cement walls will be constructed to the old bridge which is unsafe and will also be replaced by one of cement.

Both places have been dangerous for some time and this will be a great improvement.

LOCAL DEER HUNTERS BRING IN NICE BUCKS

The first "buck" of the season was brought in Saturday morning by Bob Gates of Nevada City, a nice three pointer, and weighed 146 pounds. His brother, Vic, raised him one point and brought in a four pointer, however he fell down on weight, his weighing 125 pounds. well—those things will happen once in a while.

Another member of the party, Tom Curry, brought in a nice three pointer weighing 150 pounds and these were all placed in display at the Valley Meat Market where many people called to look over the kills.

Nye County Sheriff Visits Nevada City

W. H. Thomas, of Tonopah, Nevada, accompanied by Mrs. Thomas, was ni Nevada City Wednesday on his way to the bay cities. "Bill," as everybody in Nevada knows him, is sheriff of Nye county and is one of the most popular and efficient peace officers in the sagebrush state.

Thomas is a "bug" on mining and has spent a small fortune staking prospectors and helping develop mines. He has the reputation of being one of the most fearless sheriffs in Nevada and has participated in many a thrilling man hunt. Bill has been sheriff of Nye county as far back as anyone can remember, and usually is unopposed at election time.

Mr. and Mrs. Thomas visited Mr. and Mrs. Leonard Truscott while in Nevada City. Mrs. Truscott is Mr. Thomas' sister.

Santa Monica—$300,000 post office building proposed for htis city.

RODEO SUNDAY AT PEARDALE TO BE EXCITING

Ride'em cowboy! You old bull-dogging son of a gun! Boy, those punchers shore know their stuff!

If you want your moneys worth and a Sunday crammed full of thrilling action, you'll see the fourth annual Nevada county rodeo at Peardale between Grass Valley and Colfax this coming Sunday. At a dollar ten a head, you'll see more fun than you could get anywhere else for twice the admission price, and to boot, the admission price includes a barbacue dinner from 11:30 in the morning till two in the afternoon.

To start the week-end off right, a parade will be given in Grass Valley Saturday evening in which most of the participants of the rodeo will perform. The same evening a roping contest given by Jack Star will be held in the streets of Nevada City.

Later in the evening a rodeo dance will be held at the Twin Cities Pleasure Hall. The famous Californians from San Francisco will furnish the music.

Starting the day off right, a baseball game will be held at 10:30 in the rodeo grounds between Nevada City Blues and Grass Valley American Legion Blue Jays. Both teams are rivals for leading honors in Nevada county.

The rodeo proper will start at 1:30 in the afternoon and there is enough action to last till the cows come home. Bronco and ster riding, roping, bull-dogging, musical chairs, racing and every kind of a rodeo act will be featured.

Several professional clowns will do their stuff in the most approved slap-stick manner. Little Joe, you may be sure will be on the job. Another rodeo clown will be Hoot Newmon and if you've never seen Hoot—well, you'd better not miss the chance.

The well known Nevada City Miners Band will furnish music all day, starting in the streets of Grass Valley and winding up on the job in Peardale about 10:30.

About twenty five trained horses from Barnsbys ranch at Sacramento will be a feature of the days entertainment. These horses have attended the best rodeos in the country for years. There will be plenty of riders, both local and outside boys.

John Bieber, chairman of the rodeo committee, says that all details are now completed and this year's rodeo will be the best ever.

W. E. Parsons and Carl Tobiassen are the chefs for the day.

Louie Le Duc will have charge of the cattle while Ed Granholm will handle the wild horses.

E. D. Smart, advertising manager for the rodeo, has done his work in an able and professional manner.

The gateman in charge will be Jack Stennett and Pop Westbrook. Aubrey Wisker and Al Hocking will handle the ice cream and soda pop, while Fred Bierwagon will keep order in the granstand. Seargeant-of-arms will be Alonzo Le Duc.

With a cast like that the show should be a wow.

MORE PUMPS FOR THE MURCHIE MINE WORKINGS

The Empire-Star Mine, Ltd., has just ordered two 3x15 inch horizontal two-stage multiplex pumps, each DC to a 75 h.p. 1750 rpm, 2200 volt motor, complete with automatic compensator.

These pumps are designed for a capacity of 600 gallons a minute, 310 feet total head, and will be installed in the Murchie mine east of Nevada City which is operated under the management of George A. Kirvin.

They will boost the water from the 1600 foot level up to the 1300 foot level, where the water will be handled by six four stage Byron Jackson Multiple units.

LAND TAX REDUCED BY NEVADA IRRIGATION DIST

The land tax for the 1932-3 year was reduced 12 cents per acre and salary and wage cuts were cut about 22 per cent since January 1,1932, by the Nevada Irrigation District. It is now making a strong bid to be self sustaining and without hardship to the owners.

"A DEPRESSION-PROOF NATION"

In a recent address Henry Ives, Special Counsel of the Association of Casulty and Surety Executives, developed the interesting thought that insurance is one of the best antidotes for depression.

He pointed out that insurance, of all kinds, has maintained its stability and solvency better than most governments or private enterprises, in the face of depression. It has paid all legitimate claims promptly. Failures have been negligible when other businesses were going under at a terrifying rate. It has distributed billions of dollars, and saved an army of people from financial disaster. Its value has been unchanged by chaotic stock-market and industrial conditions.

In 1931, all classes of insurance carriers paid to claimants the gigantic sum of $3,731,620,696—about as much as Congress has provided this year in this general relief appropriations and for the Reconstruction Finance Corporation. This insurance money, in addition, was not dragged out of unwilling pockets by taxation. Every dollar of it represented voluntary contributions—it was emblematic of the characteristics of thrift and foresight. And, according to Mr. Ives, practically all the money paid went to relieve distress of some sort. As he points out, if the insurance distribution had been three times as great we, as a nation, would have been three times better off.

One of Mr. Ives' sentences would bear memorizing—"An adequately insured nation would be an almost depression-proof nation." Every insurance policy purchased, whether for fire, life, casualty or what not, builds for America's future. It means a stabler, more prosperous, more progressive people. At this time insurance sales are holding to extremely high levels, in relation to the change in our purchasing power—and that fact alone is good reason for our having faith in America during the years to come.

VITAL TO THE WEST

Mining is vital in the west.

In normal times, the mining industry is the foremost employer, purchaser of supplies and contributer to the cost of government in a number of states. Its prosperity is related to that of every other business—the banker, manufacturer, farmer, store-keeper, all look to mines for a large share of their livelihood. In the pioneer days the lure of precious metals was principally responsible for the development of the west—in these days mining is necessary to the west's future developmnet.

The mines will come back. Their problems are gradually being solved. And in the meantime, it behooves every western state to do all it can to encourage the mining industry, and make its struggle for existence easier, by providing constructive regulation and taxation measure.

IS WATER FREE

Some time ago the manager of a western city made an effort to reduce taxes by cancelling some $200,000 in standby charges for fire protection paid by the city to the local municipal water district. His main argument for this was that the rates should be reduced because the water didn't cost anything.

Answering this contention a prominent taxpayer pointed out that while the water itself was free the good Lord didn't give people a dam costing millions of dollars nor the miles of aqueduct necessary to transport the "costless" water to and from that dam; nor the tunnels, nor the reservoirs, nor the street-pipes from which the "costless" water runs into the houses. These things must be paid by the taxpayers who are also liable to provide bond interest and sinking fund.

This illustrates one of the farcial phases of municipal ownership—a political system which has enabled many municipal power, light and water ventures to show a "book" profit until all of a sudden they require money for imperative needs, and the taxpayers found the treasury empty. In practically every service industry, it is the cost of bringing the service to the customer that counts—not the cost of producing the service at the reservoir or plant. To suggest the cancelling of necessary charges because "water is free", is equivalent to suggesting that food, lumber and minerals should not cost anything because nature provided them in the beginning.

MINING BOOMS GOLD

The August deposits brought the total number of deposits since the first of the year to 3326 as compared with 1942 at the end of August, 1931.—Denver Mining Record.

ONE BOY STAYS HOME BROTHER GOES TO SCHOOL

Two brothers were born and raised on a gold mine not far from here. Many of our readers would know them if their right names were used. We have been requested, however, to hide their real identity, so, for our purpose here, we shall call the oldest brother Elwood, while the youngest shall be known as Kenneth.

Elwood was the apple of the old folks eye. He was smart in his studies and always a leader in school activities. A boy with more ambition would be hard to find. And so, upon his graduation from the local high school, it was only natural for the old folk to dig down into their small savings and send Elwood to the university.

As for Kenney, well Kenny was a good boy, but he just didn't have the "get up and go" to him that Elwood had. He would just as soon stay home and work on his dad's mine as to go to school. And that is just what he did. After his second year in high school, he didn't go any more. His dad needed a good mucker, so Kenny stayed home and mucked.

But not such an ignomous career for Elwood. Our hero was too smart to waste his life away digging rock in an old quartz mine. A brilliant college career—that is what Elwood had. A remarkable student, a star on the gridiron and the toast of the sororities, Elwood steamed through college with colors flying.

Upon graduating, he was offered an attractive position as saleman for one of the leading stock and bond houses in San Francisco. As Elwood's college life was, so was his business career. Like a rocket, he careened through th ebusiness world in the big city. His name was a by-word on the lips of big business men, and his advice in buying and selling stocks was sought for.

Not only was Elwood's business knowledge helpful to his clients, but it stood his personal investments in good stead. After several years of stock market manipulation, Elwood's paper wealth was enormous. It was uncanny the way he could buy low and sell high.

What a change was this from the life he might have led on the old mine in Nevada county. Elwood smiled in a self-satisfied manner when he thought of it. But he did not often think of it—he had other far more important things to worry about.

Then came the crash. The sinking of the great financial paper ship. It took Elwood almost a year to find opt that he was broke—absolutely penniless! And by that time his company had let him go. There was no need to keep a high pressure salesman at a huge salary when there was no trading on the stock market. What a come-down! From wealth to poverty almost over night.

Elwood wasn't licked yet. He got a job selling brushes from house to house. It was hard work, but it paid his room rent even if it didn't leave much left over for food. Then his clothes began to wear out. And when he bought a second-hand suit, he had to go hungry for a few days to make up for it.

Elwood hated to admit it, but the hungrier he got, the more he thought of his old home at the mine in Nevada county. The going got tougher and tougher, until finally Elwood made up his mind to take a visit back home anyway.

And what a change at the old mine! The small ledge that Kenny and his dad were following had widened out. Enough ore had been blocked out to last several years. A new mill had been put up and seventeen men were working under Kenny who was now mine superintendent. Kenny was still the same easygoing, uneducated plodder. Still, you had to hold it to him, he had learned about gold mining even though he didn't know that Shell Union preferred had dropped two points in the last week.

As we go to press, Kenny is still mine superintendent, while Elwood is holding down a job on the same mine as a mucker.

EL DORADO CO MINE

The Camp Creek Mining company situated 23 miles east of Placerville, on the eastern belt of the Mother Lode, started production recently with a 50-ton capacity flotation mill. The ledge consists of gold-bearing quartz 3,600 feet long and 1,200 feet wide, exposed the full distance.

This ledge had been tackled several years ago, but by the latest scientific methods and modern equipment the Camp Creek company now gets an amalgamation of 96 per cent as against 25 per cent in the past.

The company consists of W. D. Peterson of Dixon, president; B. M. La Fontaine of Dixon, vice president, manager and treasurer; Harvey Collins of Woodland, secretary; C. Collins of Woodland, R. Luttges of Dixon, and W. Apperson of Oakland, are on the board of directors, with Peterson and La Fontaine.

Development of this mine began last February, and the concentrates are being trucked to Selby's smelter in the bay region.

Jesse M. Mayo, assemblyman of the sixth district, was a Nevada City visitor early Tuesday morning.

Southern Counties Gas Company 80 miles of pipie line,linking San Diego and vicinity with source of natural gas from Los Angeles basin and other Southern Californiia gas fields,,, completed at cost of almost $1,000,000.00

LEGAL NOTICE

THE CALIFORNIA DEBRIS Commission will hold a public hearing at 11:00 A. M., September 20, 1932, at the California Debris Commission office, 10th Floor, Calif. Fruit Bldg., 4th & J sts., Sacramento, California, to receive protests against granting the application of Max A. Pokorney to mine by the hydraulic process the Brush Creek Placer Mine, located near Forest, Sierra County, draining into Oregon Creek, thence into the Middle Yuba River and to store tailings on flats just below the mine.

LEGAL NOTICE

SUMMONS

In the Superior Court of the State Of California, in and for the County of Nevada.

ALICE HARE, Plaintiff, vs., C. B. CONLIN, DANA WICKS, CHAS. L. SALMON, MARY E. SALMON, W. D. HILL, S. A. PARNALL, LAURETTE E. PARNALL, JOHN DOE, RICHARD ROE, MARY POE, and BLACK AND WHITE COMPANY, a corporation, and any and all other persons, associations or corporations claiming any right, title or interest in and to the lands described herein. Defendants.

Action Brought in the Superior Court of the State of California, in and for the County of Nevada, and the Complaint Filed in the Said County of Nevada, in the Office of the Clerk of Said Superior Court.

CHARLES L. GILMORE,
Attorney for Plaintiff.

The People of the State of California Send Greetings to:—
C. B. Conlin, Dana Wicks, Chas. L. Salmon, Mary E Salmon, W. D. Hill, S. A. Parnall, Laurette E. Parnall, John Doe, Richard Roe, Mary Poe, and Black and Whie Company, a corporation, and any and all other persons, associations or corporations claiming any right, title or interest in and to the lands described herein, Defendants.

YOU ARE HEREBY NOTIFIED, that an action was brought against you by the above named plaintiff in the Superior Court of the State of California, in and for the County of Nevada, by filing a complaint in the office of the Clerk of said Court on the 30th day of April, 1932, in which action Alice Hare is plaintiff, and you are defendants.

Said action is brought by the plaintiff against you as defendants to quiet her title to the properties described in the complaint and set forth herein, and,

YOU ARE HEREBY DIRECTED TO APPEAR and answer said complaint before this Court to show what right, title, estate, lien or interest you or any of you may have or claim in or to the property described in said complaint, and herein set forth, adverse to plaintiff's ownership, or any cloud upon plaintiff's title thereto, within ten days from the service of this summons, exclusive of the day of service, if served on you in said County of Nevada, and within thirty days, exclusive of the day of service, if served elsewhere; and you are further notified that unless you so appear and answer within the time above specified, that plaintiff will take judgement, forever quieting her title to the lands and premises herein described, or will apply to the Court for any other relief demanded in the complaint.

That said lands and premises are situate in the County of Nevada, State of California, and described as

The Northeast quarter (NE¼) of the Northwest quarter (NW¼ and the Northwest quarter (NW¼) of the Northeast quarter (NE¼) of Section thirty-six (36), Township eighteen (18) North, Range eight (8) East, Mount Diablo Meridian, and containing eighty (80) acres of land, according to the official United States survey thereof.

Given under my hand and the Seal of the Superior Court of the County of Nevada, State of California, this 30th day of April, 1932.

(SEAL)

R. N. McCORMACK, Clerk.

REPORT RICH FIND OF PLATINUM NEAR OROVILLE

Word comes to us from Oroville that rumors more or less guarded have been leaking into that city within the last few days of some fabulous finds of platinum within 10 or 12 miles of town.

It is not known whether the secrecy as to location and discoveries is being maintained until mining locations are filed, or that there is a desire on the part of those "in the know" to secure options on surrounding territory.

A presistent report keeps coming in that development work in gravel carrying paying quantities of gold uncovered platinum in unbelievable quantities. Reports of assays, which up to the present time have not been verified, were surprising.

Platinum has been found in the black sand of Butte county, and in quantities worth saving in many instances. The Cherokee district is one of the few areas in the United States where genuine blue-white diamonds have been found, and geologists are of the opinion that possibly platinum in paying quantities may at any time be located in the section near Oroville.

An indication of a rich mineralized zone in that area is the find a few weeks ago of a gold ledge between Oroville and Bangor, from which a number of chunks of practically pure gold has been taken out

N. C. N. G. R. R. COMPANY TIME TABLE

Effective Tuesday, June 28th, 1932

Trains leave Nevada City at 4:45 a. m.; Grass Valley 5:05 a. m. connect with S. P. train No. 295 arriving at San Francisco at 12:10 p. m.

Train arriving at Grass Valley at 2:10 p. m. and Nevada City 2:31 p. m. bringing passengers from S. P. train 294. Daily except Sunday.

Trains leave Nevada City at 3:10 p. m.; Grass Valley 3:34 p. m., making direct connections with S. P. trains 21 and 20 for points East and West. Train 21 arrives at San Francisco 10:10 p. m.

Train arriving at Grass Valley at 6:35 p. m., Nevada City 6:55 p. m., bringing passengers from S. P. No. 20.

Youthful Strength

Dr. Magnus Hirschfeld, the world-known authority on Sexology and Director of the Institute for Sexual Science of Berlin, Germany, created

TITUS-PEARLS

to help the million of men and women who have lost or are losing their vital physical power. In his 25 years of practice and research, however, he realized that the weakening of man's glands was also responsible for other troubles: **High blood pressure, hardening of the arteries, physical exhaustion** after work or exercise, **dizziness, depression, neurasthenia, etc.**

All these troubles can be removed with **Titus-Pearls. Numerous** cases were treated by Dr. Hirschfeld in his Berlin Institute.

L. S. (State Official; 60 years old, married) complained of physical exhaustion, dizziness and tremors. Was easily tired. Mental powers dull and slow moving. Physical powers had been incomplete for previous 5 years. Blood pressure too high. Given 2 Titus-Pearls 3 times a day. 2 tweeks later the medical report on this man was: General health better, more vigor; dizziness much less and returning of power. Treatment continued and 2 weeks later L. S. reported again, this time to say that all wearinesse and exhaustion had gone; he felt fresh and buoyant. His blood pressure had fallen, and at 60 years of age he had regained the physical power and virility that he had known in the prime of life.

Start regaining your youthfulness now! To-day! In 2 weeks' time you will be aware of the new, virile force within you. Send $5.00 (cash registered or money-order) for 2 weeks' treatment.

To avoid mistakes please fill out the following coupon:

ACCIDENT-PREVENTION RECORD OF METAL-MINE INDUSTRY IN ARIZONA

Saftety of operation in metal mines in Arizona has progressed without interruption during the past nine years, according to the United States Bureau of Mines. This fact was revealed by a study of records covering 1931 and previous years which have been received through the cooperation of the mining companies and the State Mine Inspector with that Bureau. The combined accident rate for all mines within the State reached a more favorable level in 1931 than in any of the past 21 years which is the entire period covered by available and comparable records. The number of accidents in proportion to the number of men employed at the mines reached a peak in 1918. This was followed by an improvement for three years and then the rate increased until 1923, although not to the high point of 1918. Since 1923 the accident rate has been rapidly reduced, the downward trend amounting to an average of about ten per cent each year since that time. In other words, the 1931 end of the mine-accident trend line shows an accident rate only about 20 per cent as high as the 1923 beginning of the line, indicating that the mine-accident rate in Arizona has been reduced about 80 per cent during the period 1923 to 1931 inclusive.

Accident reports for 1931 covered 215 mines, including all large operations and many small ones. The reports showed 6,848 men employed, with a total of 1,705,689 man-shifts or 13,643,188 man-hours of exposure or employment. The average employee worked 1,992 hours (249 days). Accidents resulted in 18 deaths and 686 nonfatal injuries that caused one day or more of disability. The accident rate for each million man-hours of exposure was 1.32 for fatal accidents and 50.28 for nonfatal injuries, or a total accident rate of 51.60 per million man-hours of exposure. Yavapai county had a combined fatal and nonfatal accident rate of 43.67 per million hours. Corresponding rates for other counties were 90.17 for Gila county, 37.28 for Cochise county, and 18.92 for Pinal county. These four counties were the principal mining counties when measured by the number of men employed at the mines. Of the 6,848 men employed by all companies, 4,788 men worked underground, 470 in open-cut mining, and 1,590 at surface shops and yards.

Similar figures for other States are being prepared on a uniform basis by the Bureau of Mines so that comparable accident rates may be available for the metal-mining industry in all States, for use in accident prevention work.

AEROPLANE RUSHES MEN TO FIGHT FIRE NEAR COVELO

Early last Friday morning a contract plane left Oakland and soon landed at the Gilmore flying field in Grass Valley. There it was boarded by F. A. Land, district ranger of Sierraville and Allen Gracey, of Grass Valley. Taking off at 8 o'clock the same morning it took just one hour to land the men at the Covelo flying field. There they relieved the two rangers who had been fighting fire in the Covelo district for seventeen straight days.

The fire was a bad one and has burned over an as yet undetermined number of acres in the Mendocino National forest. By Monday afternoon the fire was under control and Land and Gracey returned by stage that night.

The two Mendocino rangers who were relieved were worn out from the hard fighting they had gone through. One of them was flat on his back in bed, unable to move from exhaustion.

Although the fire at this writing it well under control the burned area will be patrolled in all probability until the rains come this winter.

Several fires are now in progress in the Shasta and Klamath river districts the extent of which is not known at this time.

Stockton—Independent Meat Co. opened retail store at 608 East Miner avenue.

Mare Island—Sum of $11,000 set aside for repairs to building 53 at station here.

DR. MILES' NERVINE Liquid

SAN DIEGO MINING MAN VISITS VARIOUS GRAVEL PROPERTIES

Under the direction of M. Flatland, general contractor and mining man of San Francisco, V. J. Lab, mining engineer from San Diego, has spent two weeks in this country inspecting various gravel properties.

Among the mines Mr. Lab visited was the old Oregon Hill diggings across Oregon creek five miles above Bullards Bar. The property is owned by Pat Barclay.

Several days were spent by Mr. Lab at the Harrison French mine in French Corral, where he was impressed with the even distribution of gold in the 60 foot bank.

M. M. Coughlan of Nevada City and Dan Coughlan of Sierra City attended the funeral of their late brother, Jerry Coughlan, in Oakland this week.

Our Correspondents

NORTH SAN JUAN

Mr. Ingals of Mendocino county is visiting Mr. and Mrs. Burnett of Sweetland.

Mr. and Mrs. George Green of Sebastopol have recently entertained Charles Spangler of Sacramento.

Miss Kate Smith, a former teacher in the San Juan school, was a recent caller in town.

Whitfield Miller of San Jose was in San Juan last week, looking up boyhood friends.

F. W. Powell of Sacramento has been making a prolonged stay in Sweetland. Mr. Powell was born and raised in Sebastopol.

Rev. Mr. Wilmer, a Congregational minister, spent last Thursday night with the Jones and Burnett families of Sweetland. He preached in the school house there in the evening.

Stanley Rice has added a new coat of p aint to his nice bungalow.

Miss Elizabeth Ferguson is in Nevada City taking care of the home of her sister, Mrs. Harris. Mr. and Mrs. R. C. Harris are in San Francisco where Mr. Harris had an operation for the removal of a cataract from one eye and later will have the same operation performed on the other eye.

John Rodgers has sold his place in Sebastopol to Jack Lee. Mr. Rodgers will build himself a new house in North San Juan next to his sister, Mrs. McCullough.

Mrs. Edith Morton of Oakland was a recent caller on the Weinmans of Sebastopol, who live in her old home. Her mother came to that house as a bride about 1864. The place was then a miners' hotel kept by Gus Spooner, Mrs. Morton's father.

Mr. and Mrs. J. R. Compton of Indiana, grandparents of Mrs. Velasco and Mrs. Ennis, have recently come to San Juan to live.

Dr. Thomas, wife and son of Grass Valley, Mr. and Mrs. Frank Donahue of Oakland, Mr. and Mrs. Birch, also of Oakland,, Mrs. LaMarge of Auburn, Rev. Washburn of Grass Valley and Robert McCullough of Crockett, were members of a house party for the week-end at the Clerkins home near Pike. Mr. Washburn and Miss Clerkin each killed a fine buck deer.

Considerable work is being done on the Lohman home on Cherokee street. A new kitchen has been built, dining room remodeled and a new roof is to be put on. Mr. Rice and Mr. Danforth of Oakland are doing the work.

Jean McCullough delivered a truck load of stove wood in Nevada City Tuesday and brought back lumber for Mr. Rodger's house.

Our school has been in session for nearly a month, with Miss Alice Bayliss as teacher, this being Miss Bayliss' second year here. A number of new pupils have entered this term and 25 pupils are enrolled. which fills the school building to capacity.

San Juan may well be proud of the ambition of her young people for an education, eight boys and girls being enrolled in the Nevada City high school. French Corral sends five, Birchville four, Sweetland five, Indian Flat one, so that the North San Juan, French Corral school bus carries 23 students to the high school daily. This speaks well for the community through which the bus runs.

Mrs. Sheb Huckins and family visited Mrs. Huckins' parents, Mr. and Mrs. Steve Solaro, over hte week end.

Mrs. Tom Hart and son Donald and wife of Grass Valley, Mrs. Wodell, Mrs. Browning and sons Clyde and Harry, were guests of Miss Millie Clerkin Sunday.

The hearing before the water commission of the matter of the Morris reservoir has been postponed to Oct. 6.

FRENCH CORRAL

FRENCH CORRAL, Sept 20,—Well, Hello French Corral! We are glad to get back to tell you what is going on in the dear old town, and help out the good Nugget. Hope you will increase the subscription list, and help out the new management.

Something like two weeks ago an auto party from Oakland visited the old town—Mrs. Armstrong, and niece, Miss Jessie Armstrong, Mrs. Borden and Mrs. Johnson. The last mentioned was born in French Corral in the early 60's and her family name was McKay. They were delighted to go through the old "Corral House" which was built in 1850 and is certainly an early day relic with its frame work of hewn timbers and so many things of the olden days.

Mr. and Mrs. Henry Harris and baby daughter with his mother Mrs. Victoria Harris, and sister, Katie, and brother, Neil, were Labor Day visitors from Berkeley. All but Mrs. H. Harris and baby are natives of French Corral.

Mr. and Mrs.. Ray Smith and son of San Francisco were recent visitors.

J. W. Culver returned from Sacramento, September 15th after an absence of twelve days. During this time he attended the State Fair and visited with friends and relatives in Sacramento and Auburn.

Mrs. Estelle Nichols and son, Arthur, of Sacramento were recent visitors and spent the day with their friend, Mrs. K. Sullivan.

Bill Gish returned to French Corral last week after an absence of two months.

Mr. and Mrs. Wright and son, Billy, who have resided in French Corral for several months past, have moved to Nevada City, where he is now associated with The Nugget. While here they made many friends who regret their departure and little Billy, who is a real "live wire" will be sadly mised by teachers, and schoolmates.

Mrs. J. W. Culver in company with Mrs. Elsie Schwartz of Grass Valley attended the Smartsville chapter of O. E. S., Wednesday night. With her husband she returned to her home Thursday.

Mr. and Mrs. Benton Wilcoxon of Drumm were visitors during the week.

Wesley M. Bean and Miss Marie Ensign of San Francisco were week end visitors. Mr. Bean enjoyed a deer hunt but was not as successful as last year when he took home a fine four pointer.

Mr. and Mrs. Dewey Smith of Grass Valley were Sunday visitors.

Mrs. A. Browning and daughter, Irene, and sons, Harry and Clyde, went to Pike City Sunday to attend the funeral of the late Mrs. Rose Chatfield. —Here will mention that everyone shares the bereavement of the Chatfield family, and deepest sympathy, and keenest sorrow is felt for the loss of their beloved one.

F. S. Wood and Mr. and Mrs. Geo. Grant of Sweetland visited French Corral last week.

Mr. and Mrs. Pat Kendall and baby daughter late of Colorado are newcomers in French Corral.

Mrs. Annie Browning and grandson, Donnie, made a trip to Nevada City Sunday.

After faithful prospecting, Mr. E. De Prati has found ore of good values in his ledge, in French Corral.

John Bernot has gone to San Francisco.

Mr. and Mrs. W. E. Moulton went to Marysville Saturday and from that place were accompanied by Mr. and Mrs. Thos. Fogarty, and thence to Sacramento, where Miss Frances Moulton joined the party, which was enroute to Oakland to be in attendance at the Nevada county reunion held at Mosswood Park, Sunday the 18th. They returned Monday afternoon and report a most enjoyable time.

Clarence Meyers returned to French Corral Monday, after an extended trip down the coast.

Mr. and Mrs.. A. Labour and Mr. and Mrs. K. Broyles of Sacramento, were Sunday visitors.

The many friends of Sister M. Stanislaus, who was recently appointed Mother Superior of the new Orphanage in Sacramento, rejoice in the news of her recovery from her serious illness and trust that she will soon be able to take up her newly appointed position.

Mr. C. B. Anderson of The Nugget Mrs. Willoughby and sister, Miss Flora Peterson, visited Bridgeport and French Corral Monday and enjoyed a picnic lunch at the latter place.

Mr. William Gish formerly of Los Angeles is now making his home in one of Mrs. K. Sullivan's houses in French Corral. Mr. Gish is mining in this vicinity.

William Nichols and two children were visitors last Sunday from Downieville.

William Baker of French Corral was a recent business visitor in Nevada City.

WARD'S SPEND MILLIONS FOR FALL MERCHANDIS

Over $10,500,000 will be poured into the commodity and manufacturers' market during the last four months of the year by Montgomery Ward & Company's Pacific Coast units. Of this amount over $7,500,000 will be spent with Pacific Coast factories and in western markets. This was the announcement of Beatty Stevens, regional manager of the company for the coast, today, in explaining his firm's purchasing program for the last part of 1932.

Already orders have been placed for merchandise for delivery this and the succeeding three months of the year, according to Mr. Stevens. The total amount of the program is approximately twenty-five per cent greater than for the same period of a year ago.

"Montgomery Ward & company is convinced that we have seen the bottom of the commodity markets," said Mr. Stevens today. "We are acting on our conviction and have placed and will place nearly eleven millions in orders for merchandise to be used in our mail order houses and local stores."

"We are especially pleased to be able to announce that over $7,500,000 of this amount will be placed with Pacific Coast manufacturers and craftsmen. It should mean increased momentum for the industries of this region and, consequently, toward bettering the purchasing power of every individual.

"Careful surveys of the commodity price situation have convinced Montgomery Ward & company that the bottom has come and gone. It can not remain so with primary markets rising day by day. The move on the part of this firm is not of sudden determination but the result of months of work and planning. We propose to secure our full complement of merchandise because we believe that the demands will increase materially during the fall and winter."

It was set in two places one on each side of a ravine. The two fires soon spread into one.

Fast and sure punishment should be meted out to people who would stoop to such a criminal act as to purposely set fires to the hills in this section.

Run-Down, Weak, Nervous?

To have plenty of firm flesh and the ability to do a big day's work and feel "like a two-year-old" at night, you must relish your food and properly digest it. If you can't eat, can't sleep, can't work, just give Tanlac the chance to do for you what it has done for millions.

Mrs. Fred Westin, of 387 E. 57th St. North, Portland, Ore., says: "Tanlac cured my stomach trouble completely after three years suffering. It built me up to perfect health, with a gain of 27 lbs."

Tanlac is wonderful for indigestion —gas pains, nausea, dizziness and headaches. It brings back lost appetite, helps you digest food, and gain strength and weight. No mineral drugs; only roots, barks and herbs, nature's own medicines. Less than 2 cents a dose. Get a bottle from your druggist. Your money back if it doesn't help.

MINING ENGINEER OPENS ASSAY OFFICE IN NEV. CITY

Last Monday morning an assay office was opened in Nevada City on the corner of Main and Commercial streets by Don Carlos Billick. Mr. Billick has recently moved to Nevada City from Los Angeles where for the past year he was associated with the Minerals Exploration company, a mining firm.

Our new fellow townsman had a great deal of experience in mining engineering, having followed this profession in Alaska, South America, Mexico and many western states.

Returning to the United States last year, Mr. Billick has anticipated his entrance into business here since that time. Having realized the opportunities in this district, he has recently moved his family to Nevada City where he is making his home.

Although much of Mr. Billick's experience has been gained abroad, he should feel more or less at home here inasmuch as Downieville was the place of his birth and primary education. With the class of 1913, Mr. Billick graduated as a mining engineer from the University of California. During his business career, Mr. Billick has been employed by such firms as the Nevada Consolidated Copper company, Kennecott Copper company, Yukon Gold company, Guggenheim Bros., in Bolivia, South America and several other mining companies of note. More recently Mr. Billick as a member of the firm of the Mineral Exploration company of Los Angeles.

Considering his valuable experience in the mining business, his work as assayer in Nevada City should be both accurate and dependable.

Modesto—Bids opened for erection of postoffice building to be located at 12th and I streets.

SATURDAY MORNING FIRE BURNS HOUSE ON MAIN ST.

Fire which was discovered early Saturday morning made a wreck out of the Ogden house on Main street. The Nevada City fire department did some wonderful work in saving adjoining property. As it was the upper story was gutted and the lower story considerably damaged by smoke and water.

The loss, as estimated by the owner, Karl Kopp, is around $2000, partially covered by insurance. The fire is believed to have been caused by rats gnawing matches.

The Ogden house was recently remodeled and was occupied by Mrs. S. R. Davison, who also sustained a loss in household furnishings.

Mrs. Elliott Dies at Eureka—

Early this week Mrs. Helen Leai of East Broad street received word of the death of her aunt, Mrs. Carrie Elliott, 66, youngest sister of the late Mrs. Josephine Cooper, in Eureka, Humboldt county. She is survived by two sons and two daughters, Clarence and John of Eureka, and Florence and Claire of San Francisco. Mrs. Elliott was a native of Nevada City. Mr. Herbert Cooper of the P. G. & E. Co. of Auburn is also a nephew of Mrs. Elliott.

LARGE PLANTING OF TROUT TO BE MADE SUNDAY

The Grass Valley Rifle, Rod and Gun Club and the Nevada County Development Association will collaborate in planting a large shipment of 250,000 trout fry this coming Sunday, September 25th.

These fish will be planted within a distance of about ten miles of Nevada City and Grass Valley, heavily stocking all streams and lakes.

Santa Monica—Construction nearing completion on Children's Day Nursery building at 1441 15th St.

THREE HUNTING ACCIDENTS MAR FIRST OF SEASON

Over last week end three men were shot in hunting accidents within a few miles of the Nevada City-Grass Valley district.

The most seriously injured was Leland Sowers, 16, of Roseville, who was shot through the shoulder by Hubert Martin, a companion, in Bear Valley. It was stated Sowers had killed the deer and was shot at by Martin while trying to move the carcass. Martin mistook the waving horns for those of a live deer.

Gerald Peard, of Grass Valley, was struck by buckshot while hunting east of Nevada City a few miles, when he got in the range of the fire of his companion, Ray Teale of Nevada City. Latest reports from the injured man are that he is making a good recovery.

Charles Techt, who claims to be a magazine writer, temporarily engaged in wood cutting, was hit by a spent bullet, while taking water from a small creek. The bullet cut a jagged wound in the back of his head but it is not regarded as serious.

GRASS VALLEY PERSONALS

Miss Helene Rodda of Oakland is a house guest of Mrs. Mabel Eddy of Grass Valley. Miss Rodda expects her parents over this coming week end and plans are being made to make this city their permanent home. Mr. Rodda has mining interests at French Corral.

Charles Teberg and Caesar Marquitte, of Oakland, are guests of Mr. Teberg's sister, Mrs. George Adams of Grass Valley.

Newhall—L. A. Julius purchased Newhall Hand Laundry from Leslie Brown.

Dixon— Almonds being shipped from this place.

UNION OIL CO BUILDS OIL STATION AT RUDES AUTO COURT

Last Friday the Union Oil company of California, started construction work on their first oil station north of Grass Valley, in this territory. Six men and one truckman, working under the supervision of G. E. Monday, construction foreman for the Union Oil company in northern California and the state of Nevada, have been working on this station for a week. The station is located on the premises of Rude's Auto Court just below the high school on Sacramento street. Altho the station is the property of the Union Oil company, it will be operated by Mr. Rude.

The Station is the two visible pump type and is most modern in design. It is complete with large storage tanks and an air compressor which will furnish free air to customers.

Besides a complete line of both eastern and western lubricating oils, grease, and standard auto accessories, this station is featuring the famous Union "76" gasoline. In addition to the "76" the Unoco gasoline, a so-called competitive gas manufactured by the Union Oil company is being handled.

The Nugget wishes to commend the Union Oil company for its policy in employing men and in purchasing material. All of the men employed in constructing the station are residents of Nevada City, with the exception of the construction foreman. Likewise, all of the material used in the construction work was purchased from Nevada City firms. A mighty fine policy we call it.

In the Nevada City district there are over 150 Union Oil stockholders. With that number of probable customers as a starter this new station should make good with a bang.

BONDS ISSUED TO COVER COLFAX ROAD WORK

The Board of Supervisors this week accepted the Colfax Grass Valley road construction and have ordered bonds issued to pay for this construction work.

These bonds will be issued and delivered in about two weeks to the Capitol Construction company, which had the contract for the building of this road. It is understood that the bonds have been assigned by this company to cover advancements made to it.

MRS. BUCKDAHL CATCHES YOUNG FOX IN GOPHER TRAP

Mr. Buckdahl, who has been prospecting north of Nevada City for about a year, was in this city Tuesday morning. He stated his wife caught a young fox that morning in a gopher trap and carried it to camp in her hands by holding closely to its throat. He has already had an offer of several dollars for the fox from a local business man who wants it as a pet.

It was Mrs. Buckdahl who waded thru the deep snow last January and was picked up by mining men and brought to town to dispose of a tiny vial of gold, and the kindly Nevada state men saw to it that she went home with enough provisions to last for a number of days.

SUBSCRIBE FOR THE NUGGET.

In selecting Mr. Rude as the station operator, the Union Oil company has chosen a man already established in Nevada City. Mr. and Mrs. Rude have owned and operated the Rude Auto Court for five years. Two weeks ago they opened, in connection with the court, a store which handles a complete line of groceries, candies and ice cream. And now, with the opening of the oil station, Mr. and Mrs. Rude can be assured of a thriving business.

DR. BELL HAS NOT SOLD DENTAL OFFICE

The rumor spread about town for several days that Dr. J. R. Bell had sold out his dental offices in Nevada City.

We called him up in regard to the rumor and he stated most emphatically, "No!"

It seems that he has had a good offer for his practice but turned it down.

NEVADA CITY CHILD SUFFERS PTOMAINE POISONING

Little Lois Reed, three year old daughter of Mr. and Mrs. Read of this city is recovering from a slight touch of ptomaine poisoning.

Lois' illness came from indulging too heavily in frankfurters last Tuesday. Being a robust and healthy child, however, she has by this time nearly passed the danger point and will soon be asking for more frankfurters.

Santa Ana—New water pipes being laid in number of local streets.

LEGAL NOTICE

FORFEITURE NOTICE TO CO-OWNERS OF MINING CLAIM IN YOU BET MINING DISTRICT

TO J. A. SIMPSON and L. E. SIMPSON;

NEW HOGE MILL IS MODEL OF EFFICIENCY

Continued from page one

chine of the same kind, it being the two cell Kraut type.

The cleaned concentrates then are pumped by centifrugal method into a huge wooden tank. This tank is a thickener for the concentrates. Uuon leaving the tank the thickened concentrates go through a continuous Oliver Filter machine to the finished concentrate bin, from where the finished product is shipped to some smelting company.

Going back to the six cell flotation machine, we find that the tailings are washed onto a Diester table. This table is incidental to any actual recovery of precious metals. Composed of many riffles, and being subjected to a continual forward and backward motion, the table is however an accurate gage as to the efficiency of the mill. In other words, if much percious metal is recovered by the Diester table, which only processes tailings from the six cell flotation machine, it is a certainty that somewhere the mill is not adjusted properly for the ore handled.

Tailings from the two cell cleaner machine and from the concentrate thickener are all piped back into the drag classifier, and from there are again subjected to the flotation process.

The coarse Blake jaw crusher is of a size that a run of eight hours will feed the mill for the full twenty four hours.

Adjoining the mill is an assay office, where tests can be made at any time.

The plant is designed not only to recover the native gold, but also the total sulphide content of the ore which carries a majority of the gold values.

The mill was designed and installed by Otto E. Schiffner, the company's general manager and is so designed and constructed that the capacity of the same can be increased from 50 tons per day to 100 tons per day, at an expense of not over five or six thousand dollars.

During the next six months the company is going to carry on considerable development work, and probably later on give out some leases, in addition to carrying on their regular program of mining and milling.

The Hoge Development company now have a full 100 per cent ownership of their vast property which embraces a territory of over two square miles.

Stations have been cut on the vein at the 300 foot, 450 foot and 600 foot levels in virgin territory that has shown exceptionally good gross values from their actual mill and smelter shipments to the extent of 7,000 tons of mine run ore. The average gross value was in excess of $20 per ton.

The Hoge mine is one of the best equipped mines in the Nevada county district today and with their main three compartment shaft down to a depth of 642 feet and the three levels opened up in good mill grade ore, they have with their large acreage, a most promising future for becoming one of the outstanding producers of the famous old camp. Within the last few days men have been employed until they now have 60 men working.

FOUNTAIN OF YOUTH STILL IN EXISTENCE

If the weary traveler happens to stop on the way to San Juan at the Service Station called the "Willow Tree" where mine host Henry Huckins holds forth with a "smile that would not erase" and should happen to see many goings and comings from the spring near by—there is a reason and the reason is expressed in the following bit of poetry or What Not:

Drink Ye the Water
From the Fountain of Youth—
Be not deceived—
Seek Ye the truth.
This water is free;
It costs much for a gland;
Results are the same—
You'll understand.
Enough said—A word to the wise.
Drink Ye the water—
And Realize.

EIGHT DOLLAR ROCK FOUND AT 60 FOOT DEPTH IN TUNNEL

C.. H. Elster, who is working mining ground, 10 miles below Grass Valley on the McCourtney road next to the O'Dell ranch, has recently sunk a shaft to the 60 foot level. At this depth he struck a four foot quartz ledge that runs about $8 par ton.

San Jose—New Hester Dairy Fountain opened at 295 South First Street.

OROVILLE BUSINESS MAN TAKES BRIDE IN RENO

The many friends and business acquaintances of George W. Zetzsche,, proprietor of the Oroville Assay office, were agreeably surprised this week to learn that his "business" trip to Reno last week was prompted by the fact that Mrs. Bertha Gage, Hollywood resident, was awaiting his arrival, and that plans for a wedding had been kept a close secret.

The ceremony took place Saturday, a number of congratulatory functions followed, and the happy couple returned to Oroville. Mr. and Mrs. Zetzsche have taken an apartment temporarily, but expect later to purchase a homesite and erect a building embodying their ideas as to just what a home should be.

Mr. Zetzsche stands high in his profession, and the establishment of his business here has given mining of the area an impetus. Mrs. Zetzsche gave up a career to become the local man's wife, having been starred in a number of popular films.—Oroville Press.

Both Mr. and Mrs. Zetzsche are former Nevada City residents. The bride is the daughter of Mrs. Langley of this city, and the groom was employed by the Murchie mine while Mr. McCraney was superintendent of the property. Their friends in Nevada City wish them much happiness.

ENCOURAGING SIGNS SHOW BUSINESS IS PICKING UP

There are many encouraging signs, says the Bank of America Business Review, released today by the bank's Analysis and Research Department.

Employment throughout the state has definitely gained in the last 30 days. The largest increase in considerably more than a year is shown by the figures compiled. 1186 firms reported an increase of 15 per cent in the number of employes on the August pay rolls.

August figures for building in 19 leading centers exceed the July figures by 18 per cent.

Demand deposits in the reporting banks of the Twelfth Federal Reserve district increased from 544 million dollars to 562 million dollars. Bank debits for August in the fourteen cities reporting to the Federal Reserve Bank showed a slight decrease as compared with July.

Commodity prices have continued their upward march started in June.

Water commerce has continued to show the upward trend which was so evident in July. Los Angeles water-borne commerce for the month of August, with a total valuation of approximately $60,000,000. shows an increase of $2,250,000. over July of this year.

Other promising factors are an increase in activity in steel production and a contiuation of the advance in electric power production and carloadings.

GRASS VALLEY FIRE DEPT. PUTS STOP TO RAGING FIRE

At 4:20 last Sunday afternoon, a fire broke out in the ice machinery room of the Empire Meat Market on Main street in Grass Valley. Within a few minutes the fire was under control, due to the efficient work of the Grass Valley Fire Department.

Flames mounted to a height of over one hundred feet, which with huge clouds of white smoke, soon dred a crowd of nearly two thousand people.

Great damage was done to the ice plant, rear and roof of the Empire Market. The neighboring stores also suffered some damage. These included Ed Burtner's Grass Valley Cleaners, Win's Poultry Shop and the W. D. Harris & Sons furniture store. The damage to these stores was confined to the roofs for the most part.

Nevada City High Football Team Will Play Auburn

For the first time in six years, Nevada City high school will put a football team on the field for actual competition. The team is traveling to Auburn Saturday to play the Auburn high school class "B" team.

With twenty men out for the team this year, Coach Barren has moulded a smooth working combination of players into a potentially strong team. Although the team has had but two weeks of practice behind them, and many of the players have had no competitive experience, Coach Barren is quite optimistic about the team's chance for a victory this Saturday.

Practices to date have taught the players much of the rudiments of modern football, Coach Barren having given a lot of stress to fundamentals such as clipping, blocking, interfering and tackling. Further instruction has included kicking, passing and ball carrying. The final touches of offensive and defensive functioning of the team as a unit have not yet been perfected. As the season progresses a mechanical precision along these lines will be the aim of the team.

Although there are few veterans o nthe team, all of the players show a willingness to learn. The line averages 152 pounds from end to end, while the backfield tips a 151 lb. average.

The tentative line-up for Saturday as given to the Nugget by Coach Barren is as follows:

Position	Player
Right End	Tamblyn
Right Tackle	Casci
Right Guard	H. Brown
Center	Tucker
Left guard	Barry
Left Tackle	Schiffner
Left End	Joy
Quarterback	Chapman
Right Halfback	R. Pierce
Left Tackle	Toccalini
Fullback	Oates

MINE ASSOCIATIONS ACTIVE IN POINTING WAY

The following article gives some idea of what the outside world thinks of our mines, business men, twin cities, and the outlook for our section:

Traveling miners, ten day lads, are always in touch with the activities in mining, not only in California and Nevada, but in all of the western mining fields. Making their way to Los Angeles or Las Vegas, many of them lay over at Mojave, in hopes of catching on at the borax plants or a possible chance at the local mining field.

In all of their travels they report that both Nevada City and Grass Valley mines and mining are leading in the present revival of mining in the Mother Lode country. They attribute the cause to the Mining Association Chapters at Nevada City, Grass Valley and Sacramento, a body of workers that have interested every business man to not only contribute their share of the expense but who gave their time whenever called on. And in such cases and work, all of the twin city newspapers went the limit.

One year ago, the number of miners working in the mines at Nevada City and Grass Valley, were easily counted, but today they number in the four figures.—Mojave-Randsburg-Record Times.

NEW P. O. RULING

Under the Act of Congress passed July 21, 1932 the U. S. Post Office Department is authorized to collect from publishers of second class mail (magazines, etc) two cents on each piece that is incorrectly addressed.

In other words, if the addressee fails to notify the publisher of any removal, discontinuance, or change of address the P. O. charges 2 cents.

INTER CITY BUS LINE BOUGHT BY JOE SPENCE

Joe Spence, who has been a driver of the Nevada City-Grass Valley bus line since it was started in January 1923 by Doland and Grissel, purchased the line the latter part of last week.

It was operated previous to 1923 by the Nevada City Traction company as an electric line.

Dolan and Grissel found it necessary after a time to discontinue the buses on Sunday and later the service was cut down to no buses later than 6 o'clock in the evening on week days.

No changes in schedules are contemplated at present, but Mr. Spence announces he intends to put on new equipment later.

Dolan and Grissel, who own and conduct the Twin Cities Clothing store in Nevada City, also have a mail contract between Nevada City and Downieville. In the disposal of the bus line they will have more time to devote to their store.

Oakland—Bowles Drug Store is opened at 3932 Telegraph Ave.

MODERN AMBULANCE SERVICE

YOU WOULDN'T HURT THEM FOR THE WORLD

and yet....

many homes have light — *that's ruinous to eyes!*

No one intentionally wants to have poor lighting in the home, especially when young folks must study and read at night. But many people do go on living with light that is ruinous to eyes.

There is for example the very faulty belief that light must come from over the left shoulder. No one knows just how such an idea started . . but it's all wrong. Good light to read by should come from all around; abundant light, not mere brightness; plentiful light, broken-up, softened and diffused.

Unshaded lamps, no matter how bright they may seem, are almost as far behind the times as clustered candle light or coal oil lamps.

Use plenty of light from globes of sufficient wattage, shade them properly and arrange them to light the whole room and you are employing the best use of modern lighting. The comfort you will get from such use of light will surprise you, especially if you have been using light that glares and tires the eyes. Also the low cost of good lighting will surprise you. The cost of light, both for lamps and for current, has been going down for more than fifteen years.

Make a test and see how great a comfort abundant light can be and how fine a preservative it is of eyesight and eye usefulness. Light the whole room, have light that fills the room and comforts the eyes. Forget about old notions such as spotting light from over the left shoulder.

J. M CAMPBELL KILLED IN FALL IN MINE SHAFT

Last Saturday evening at about 6 o'clock J. M. Campbell, married and father of twin boys about three years old, fell to his death in an 80 foot shaft of the Sacred Mound mine near Sierra City, Sierra county.

He was loosening ore near the top of the shaft to be run into the mill the next day, when either he must have slipped and fallen, or the rock caved, precipitating him to the bottom of the shaft.

The body was taken to Portola and prepared for burial, later being shipped to his home in San Antonio Texas.

Mr. Campbell and partner took over the Sacred Mound mine several months ago and have been working the property for the past few months.

BUTTE COUNTY MINES

Treasure Box, Ltd.

The California Treasure Box, Ltd., which is backed by Los Angeles and San Francisco capital, is preparing for comprehensive development of a section of the Mammoth Channel at Magalia.

The company owns 3,500 feet along the channel and holds a lease on another 5,500 feet.

Both hydraulicking and the usual sluice method of operation are contemplated as the work gets under way. Water is said to be plentiful, and tests are credited with disclosing extensive deposits of profitable material.

Stockholders of the Walberg mine near Challenge, were informed that for the last month the mine had paid all expenses for the month, for the first time since it was opened three years ago.

Miss Irma McCormack teacher from Roseville, was a visitor over last week end in Nevada City with her parents, County Clerk and Mrs. R. N. McCormack.

O. E. Schiffner spent last week end in San Francisco attending to business affairs.

MRS. ROSE CHATFIELD LAID TO REST SUNDAY

Friends and neighbors of Mrs. Rose Chatfield, who was killed in an auto accident last week, gathered from far and near at the little church in Pike City Sunday to pay tribute of respect to her memory.

Rev. H. H. Buckner conducted the services and there were many beautiful flowers in evidence, the casket being entirely covered.

The body was carried to its last resting place in the little cemetery at Pike City by Messrs. Ashcraft, Robinson, Gilmore, Godfrey, Mohler and Wood.

ALBERT ISMERT PASSES TUESDAY AFTERNOON

Albert J. Ismert, who was born in Buffalo, N. Y., in 1856, passed away at the pay ward of the county hospital Tuesday afternoon. He had resided in Nevada county nearly 75 years and at one time was in business in Nevada City. For several years he has resided at the old home place in Glenbrook Park.

His wife was the former Miss Lillian Gregory. The following relatives survive, three sons, Carl, Chester and Eugene, and the following brothers and sisters, Edward of Irvington; Henry of Kansas City; Mrs. John Irving of Sacramento; Mrs. Rose Sacket of Berkeley, and Mrs. Lillian Mack of San Francisco.

He was a kindly man always ready to help where ever possible.

Holmes Funeral Home conducted the arrangements, burial taking place at 10 o'clock Thursday morning.

His brothers and sisters were here during the summer and held a family reunion at Lake Olympia, besides spending some time at the old home place, and visiting friends in Nevada City.

E. J. Pollard was in town Wednesday from his ranch up on the Tahoe-Ukiah highway and stated his wife is steadily recovering from a recent serious sick spell.

THE FIRST GOLD DIGGER

Placer County's Exhibit at the State Fair
A Replica of James Marshall, Discoverer of Gold

The Yuba River Country

July 4th, 1859, saw the completion of the stage road from Camptonville to Mountain House, Goodyear Bar, and Downieville. For the first time Downieville, the metropolis of the North Fork of the Yuba River Canyon, was connected with Grass Valley, Nevada City Marysville, and the balance of the state by a comparatively comfortable mode of transportation. For 10 years the only method of getting in and out had been by foot or horse back. Even famous actresses and actors who came from the Atlantic sea board, some even from Europe, were packed through Camptonville, past Mountain House and into Downieville on horse back. The first stage left Camptonville on that historic Fourth of July profusely decorated with flags and banners. The horses were decked out with red, white and blue. It was a great day for the entire mountain region and the hero of the occasion was Colonel Platt of Forest City, whose untiring efforts had been largely responsible for the success of the road building venture. This first gloriously be-decked stage stopped at the Mountain House, famous road side hostelry of early days. Then began the thrilling and highly scenic descent into the canyon of the North Fork of the Yuba at Goodyear Bar. For five miles the road winds down and down—now as it did then. The inside bank is frequently covered with moss fed by the waters of hundreds of springs. Wherever a draw is crossed, water cascades down into the canyon. Outside of the road the tree covered canyon walls fall away nearly perpendicularly to the bottom of the Woodruff Creek Canyon. And at every turn a wonderous new vista of the picturesque canyon is disclosed. Finally the rod reaches the shore of Woodruff Creek and follows down, nearly a mile, to Goodyear Bar. Part of the waters of the creek are carried in a flume so as not to be contaminated by the Brush Creek mine which operates just above, for the hotel at the Bar has a water right which entitles it to clear mountain water—and this water right must be respected.

In the late summer of 1849, four men, Miles and Andrew Goodyear, Dr. Vaughan and a Mr. Morrison steeled in the little canyon walled valley now known as Goodyear Bar. Discoveries of rich deposits of gold caused a heavy influx of prospectors. Miles Goodyear died that first November and was buried on a point opposite Goodyear Bar. An old rocker became the casket and a buffalo robe was used for a shroud. Later the body was removed by the brother, Andrew, to some point in the valley. The winter of 1849 brought a food famine to the settlement and most of the prospectors left for below. Flour was the scarcest and even beans, the standby of pioneers in every country, were not to be had. Although miners brought gold it was almost impossible to exchange it for food and everything that was sold brought one dollar a pound, whether food, tools, or blankets.

Each bar on the river had its name—St. Joe, Nigger Slide, Woodville—first named Cut Throat because a sick German had cut his throat there—Randy Doddler and Hoodoo Bar were close to town. When an Indian returned a "Howdye-do" it sounded like Hoodoo and gave the bar its name. About this time miners were so thick all along the North Fork of the Yuba River that it was reported a message could be sent from Marysville to Downieville in 15 minutes by word of mouth—by each miner to his upstream neighbor. In the fall of 1850 an erysipelas epidemic broke out in Goodyear Bar. Miners built a log cabin to be used as a hospital, which was maintained by subscriptions. Daniel Cowley made the collection and his leather purse was filled many times, packed to the top with frely given gold dust. Dr. Barkdul of Ohio was the physician. In 1852 Peter Yore made his first lucky find. Having several men at work on his gravel mine at the North end of the Kennedy ranch he saw one of them standing over the Long Tom holding up his hands and exclaiming "My God, My God!" One wheel barrow of dirt had paid over $2,000 in gold. Today Goodyear Bar has its houses filled by vacationists each summer—the houses that are not occupied by gold miners— and each summer the population inceases. History seems to be repeating itself—but most of those who go there today are looking for golden complexions—but in the crowds there are still many prospectors—with their pick and pans. But the red flannel shirts are missing.

FIRES IN THIS SECTION FAR BELOW LAST SEASON

To date there have been 33 brush and timber fires during 1932 in Nevada county outside of the National forest. This number is unbelievably small when compared with the 114 fires in the same district that we had to like date last year.

The 33 fires this year have burned off a total of from 1650 to 1700 acres of land..

Although we perhaps do not like to admit it, the fact remains that thit great decrease in the number of fires must be due to the fact that this year no outside men are paid 30 cents an hour for fighting fires as was done during past years. Nobody likes to fight fires for nothing, but if paid 30 cents an hour for the work, there are evidently many men who would be willing, even anxious, to fight one fire after another..

We can readily appreciate the hardships that unemployment presents to many men. We cannot do anything but condemn however, the man who will jeopardize life and propedty in order to gain a few dollars for himself.

MANY DEER COMING INTO TOWN DURING FIRST FEW DAYS

Three nice deer are hanging up in the Keystone Meat Market at the present time. One of them was killed by J. J. Jackson of the Bee Hive Grocery store, and weighed 135 pounds; while Charles Genasci kiiled another weighing 75 pounds.

Several other parties about town have killed fine deer, while a number of machines carrying hunting parties were seen passing through town with good sized deer on their cars.

YOU BET COUNTRY SAVED FROM BIG FIRE SATURDAY

The Gearhart ranch was the scene last Saturday of a fire of incendiary origin that burned seven acres of brush and timber. Located between You Bet and the Bear River, the Gearhart ranch was saved from further damage by fast work on the part of assistant State Ranger George Howe and his crew of 14 men from the California State Division of Forestry camp in Nevada City.

Called to the fire at ten thirty in the morning, the rangers from the local headquarters had the fire well under control by two in the afternoon. In doing this work they used the two regular fire trucks and equipment.

To prevent a further outbreak two men were stationed at the fire all Saturday night.

The fire was evidently set by people who wished to burn off the hills in that part of the country.

AMADOR COUNTY MINES SHOW MUCH ACTIVITY

Mining operations at the smaller properties between Pine Grove and Volcano, in Amador county, are showing promising results and interest is being concentrated in a number of the claims in that section.

Emmet Gillick is preparing to start operations at his claim which is located near the Williams mine. This property was recently operated by the Kelsey brothers of San Jose. Mr Gillick intends to operate the mine from the south end of the tunnel and is arranging at the present time to begin sinking operations. The tunel is in about 100 feet, and there is a winze 60 feet in depth.

The Williams mine is showing good values in ore, and the 10 stamp mill is now ready for operation and soon will be falling on some rich rock. The company first centered activities on development work to ascertain the extent and quality of the orebody.

They now have 3000 tons of ore ready for the mill. The rock was assayed recently and averaged from $10 to $15 a ton. On the 175-foot level, good grade ore has been found during the past few days. The management of the property is elated with conditions as they stand now.

The owner of the mine plans to sink another 200 to 300 feet. The present depth of the mine is 200 feet. The top workings of the mine are up-to-date in every respect.

The Haverly property, near the Williams mine, is being opened up by Washington capital at present. Preparations are under way and the present company has to go a distance of 58 feet in the tunnel before the pay shoot is reached. Mr Husband is in charge of operations. The Haverly has a good record as a producer in the past.

W. H. Hall has been operating at the Old Dane mine, and a few days ago opened up a six-inch ledge of high grade on the hanging wall. The Old Dane was started by Mr. Hall in the middle of July, after it had been idle for nearly fifty years. The mine is a tunnel claim, and old-timers say that it had a good production record.

The old Golden Gate mine is being opened by Wilson and Myers. This claim is a quartz mine and has been idle since the early '60's. Emmet Gillick, owner of the mine, reports that in early days considerable gold was produced.

Other properties above Volcano which at present are showing signs of activity are: Whitmore which is being operated by the Russel brothers and a number of gravel claims. The Lagomarsino brothers above Volcano are finding good gravel on their claim, and the Garbaldi brothers near Volcano are meeting with success at their property.

EXPLANATION

The George Adams that we reported killed last week in a blast explosion has often been mistaken for a George Adams that lives on Main street in Grass Valley. We wish to inform the public that there is no connection between these two men.

Old Abandoned Mine Yields Prospector $4000

Be one of the fortunate, use skill and wisdom. Find the richest spots. Get your big stake now and be independent when winter comes. Thousands are now combing the hills and reports of many rich finds have been recently made in various parts of the gold country. These were mostly "lady luck" finds after much hardship. Don't go out half cocked, spend $1.50 or $3.00 extra on your kit by adding the Guggenheim Gold Detector and add more wisdom than luck to your finds. These are indestructible, scientific instruments with which you may without any knowledge of your field, find plenty of placer gold and silver and rich placer pockets that often contain fortunes. No prospector should start on a trip without them. Price $1.50, professional size $3.00. Send money order or cash. If you are dissatisfied with them inside of 10 days, send them back and we will refund your money.

Sheriff George R. Carter is in Fresno attending the State Convention of Sheriffs.

H. S. Tibbey, former editor of the Mountain Messenger in Downieville was a visitor in Nevada City Wednesday.

Mr. and Mrs. J. J. Murphy of Woodland spent a few days visiting at the home of Mr. Murphy's grandmother, Mrs. George Fortier of Nevada City. They returned home early in the week.

Nevada County Road Department purchased an up-to-date combined rock crusher and loading machine Tuesday of last week and will immediately put same to work fixing up the county roads. The rock crusher was brought over the N. C. N. G. R. R. line.

R. E. Harris Improves—

R. E. Harris, proprietor of the Harris Drug Store in Nevada City successfully underwent the operation for the removal of a cataract from one of his eyes. He is staying in a San Francisco apartment with his wife and within a few days it is expected that he will have an operation performed on the other eye.

Miss Minnie Brand has returned from a visit with her sister, Mrs. R. W. Gaylord and family in Sacramento.

Mr. and Mrs. Carl Ismert of San Francisco came to Nevada City Tuesday having been called here by the death of his father, the late A. J. Ismert.

James and M. J. Coughlan of Moores Flat visited in Nevada City Tuesday.

Mrs. Elsie P. Willoughby and sister, Miss Flora Peterson, returned to Nevada City Sunday from a week's vacation at Lake Tahoe, where they indulged in sight seeing and taking a much needed rest.

The Placer-Nevada District Council Meeting of the P. T. A. at the Methodist church in Nevada City Wednesday afternoon was largely attended and proved most interesting and instructive.

Officer Fouyer on Vacation—

Officer William C. Fouyer of the State Highway Patrol, is on a two weeks vacation in the mountains near Truckee. He was accompanied by Orrin Thompkins and they will spend some time hunting and fishing.

Mrs. Eleanor Hoeft De Wein and Mr. and Mrs. Smith returned Monday evening from an inspection of the Dipper group of claims, which Mrs. De Wein and husband own, in the Alleghany mining district. She brought down some fine specimens of ore from the property.

Early Tuesday morning Paul E. Rohrig, proprietor of the local barber shop left for Sacramento on business with Mrs. Rohrig. They returned late the same night. Bert Benton of Grass Valley took Mr. Rohrig's place at the shop for the day.

Charles Tegler, who for many years was actively engaged in the candy business in Nevada City, dropped in town Monday to renew old acquaintances. He says Nevada City is the busiest little town he has laid eyes on for some time.

Roy Walsh, brother-in-law of Carl Larsen, who has been selling gas at the Plaza Service station for several months, spent a month in Los Angeles with his wife and daughter, and attending to businesss pretaining to his mine near North Bloomfield.

Several Attend Reunion—

Among those attending the Nevada county reunion at Moss Wood Park in Oakland last Sunday were, Mr. and Mrs. George Calanan, Miss Mary Meservey, Mr. and Mrs. John O'Neill, Miss Maryette Wilder, and Congressman and Mrs. Harry Englebright. Messrs Englebright and O'Neill delivered addresses on the progress of Nevada county that were greatly enjoyed by all present.

Dick Haddy, proprietor of the Coffee Cup, made a hurried business trip to Sacramento Wednesday.

Mrs. M. M. Coughlan is visiting with her mother in Red Bluff for a time.

The Betty Jean Shop, located in Oroville, California, will give their Fall Fashion Show Saturday night, September 24th, in the Oroville Inn. A nice display has been arranged..

Misses Nina and Ellen Omar of Tonopah, Nevada, are guests of Miss Jennie Berthin of Nevada City this week.

Mrs. Zina Linnell of Berkeley, the former Miss Zina Rodda of Grass Valley, is visiting her daughter, Mrs. H. B. Wright of Nevada City.

While hauling a load of furniture from French Corral to Nevada City Tuesday afternoon, George Adams, Grass Valley painter and paper hanger, burned out a connecting rod bearing in his truck near Blake's game reserve.

Mr. and Mrs. A. L. Skillin of Alleghany have returned home after spending some time in Siskiyou county, visiting relatives, and on their way home spent two days in Grass Valley visiting Mr. Skillen's sister, Mrs. C. Stauffer.

Sunday morning, Fred Crabbe, local song writer, left for a few days pleasure trip in Sacramento. Returning Wednesday morning, he reports having a complete rest and that he is again ready to buckle down to his cleffs and trebles.

Wesley L. Davis of Carpenteria, California, dropped into The Nugget office for a visit Thursday afternoon. Mr. Davis is owner of the newspaper, Carpinteria Valley Facts. After a pleasant chat with The Nugget Staff, our visitor motored on to Downieville.

Joe Sullivan Apprehended—

Joe Sullivan, broke into the Lewis Notion Store last Friday and was caught by a local officer. He was given a preliminary hearing before Judge Ocker, and then brought to Nevada City Tuesday to be held over for the superior court.

John Howarth Soon To Recover—

John Howarth, who was badly injured in a mine blast several days ago, that took the life of George D. Adams, was moved to the home of his mother-in-law, Mrs. George Fortier, in Nevada City from the hospital in Grass Valley. Mr. Howarth had so far recovered from his injuries that he was able to be down town Tuesday. He is the father of Miss Margaret Howarth, who is attending school in the east.

Berkeley — $300,000 United Artists theatre officially opened.

Albany—$20,000 span to be erected from Tiburon to this place.

MAN STRUCK DOWN ON HIGHWAY FOOT INJURED

Mr. Baldwin of Town Talk while walking on the highway toward Nevada City near Tredennick's service station, was hit by an automobile about 6:30 Wednesday afternoon. The carknocked Baldwin down, ran over his foot, injuring it badly and sped away without offering aid.

Mrs. H. B. Wright, a member of The Nugget staff, seeing the accident from a distance, offered aid. She drove him to Dr. Werner's office in Nevada City.

Leaving a perfectly good meal Dr. Werner hurried to his office to find that the injured man had vanished.

Lumber Talks!
Roofing

Winter winds will soon be blowing,
Rain will soon come pattering down,
Snow perchance, will spread a mantle
Over mountain, vale and town;
So the roof said to the owner,
"Come wild storms or gentle dew,
Let your mind be calm and peaceful,
I'm outside protecting you."
—A. M. C.

Winters are varied in this beautiful coign of the Sierras, but with a good roof over one's head we face the rainy season with confidence.

This is the season when the wise property owner examines his roof and prepares for the days to come.

We have a supply of shakes, cedar and composition shingles, that will meet your requirements. Owing to the fact that lumber mills have fallen below normal production this season, and that many of them are already closing down for the winter, the supply of shingles is not inexhaustible; we therefore urge our patrons to repair, renovate and renew the old roof now. Call and talk your roofing problems over. Act now and assure for yourself and yours a comfortable and unworried rainy season. Your most valued possessions are under your roof. If it has outlived its usefulness replace it. If it leaks—mend it. At this season of the year—THE ROOF'S THE THING.
